Fintech Finnova Laboratory

Fintech Lab is a place for students providing some services like; accommodation space, training and new infrastructures base on financial technologies and is a bridge between industry and talented students.

This center presents important services such as providing innovative strategies in financial industries and ecommerce, employment in programming and software development, changing ideas into expandable businesses in business intelligence, block chain, FinTech and analyzing services. The organizations and companies can present their own challenges and issues in this space according to their field, and then students provide their strategies. Also, the students can hold their favorite events and education workshops in this lab.
